

To bring people together in their community and empower them to make a difference;

To raise development issues pertinent to local areas;

To increase the biodiversity of Hindmarsh;

To allow work of local artists to be showcased in the public domain;

To encourage local businesses and light industry to play an active role by contributing to the community and improving the appearance of their businesses and surrounds;

To lobby Council and developers to ensure that adequate green space is reserved and that new housing design reflects the history and diversity of residents and is also environmentally responsible;

To make the Hindmarsh area a better place to live!
